Thread: [Rat That Builds .jar?](#)

doeland444 - October 19, 2019, 9:47 pm

Are there any rats that currently build a client in .jar instead of .exe?

just curious, about to start googling

No, it's not. It's called a Java RAT.

OP you can find the most recent one for free here:

I know the people who cracked it and it isn't for sale, it also doesn't require any external links or variables so the crack is completely working.
