Thread: [Start contract button](#)

Zero - October 20, 2019, 12:59 am

Hey,

So this must be a very dumb question but how do I make this button on a thread?
One that will direct buyers to a contract with me regarding the same thread?

Thanks

Code Contract MyCode

Thread Auto - This allows TID field to be auto-filled from a post. When this button is posted it will automatically grab the TID from where it is posted.

[contract=tid]Start Contract[/contract]

Blank Contact - This will create a button that will take you to a blank new contract page. No information will be auto-filled.

[contract]Start Contract[/contract]

User Filled - This allows you to auto-fill a UID when the button is clicked. You must supply the UID.

[contract=uid=1]Start Contract[/contract]

User Auto - This allows UID field to be auto-filled from a post. When this button is posted it will automatically grab the UID from whoever posted it.

[contract=uid]Start Contract[/contract]

Thread Filled - This allows you to auto-fill a TID when the button is clicked. You must supply the TID.

[contract=tid=5847344]Start Contract[/contract]

You actually don't need to do anything. For example, when you make a thread on CE section, the "Start Contract" corresponding to your thread is auto created. But, you can find more details here: <https://hackforums.net/showthread.php?tid=5933568>
