N16H7M4R3 - October 20, 2019, 1:16 am

Hi guys!

I created malware that infects the boot sector.

It's called HelloWorld...

I don't know if I'm publishing this in the right section, but I hope so yes.

I'm new here, so I want to make a contribution - with my malware.

If you are interested, I can send a download link.

StrongMinds - October 20, 2019, 1:30 am

MBR rewrite? that is some old ass shit.

N16H7M4R3 - October 20, 2019, 1:49 am

Malware overwrites the MBR and fatally damages the hard disk. A simple way with fatal consequences.

CyberStrike - October 20, 2019, 6:40 am

A contribution is a contribution and is not a bad thing. I am sure you learned things and got some experience. I think that some of the more technical members would probably like to see source code rather than having a precompiled binary, of course that is up to you.

N16H7M4R3 - October 20, 2019, 10:18 am

Thanks, and i can send source code.

CyberStrike - October 20, 2019, 12:54 pm

If you want put on pastebin or GitHub perhaps something similar even on the forum if it fits but it's a good way for people to learn and see that things are doable with some effort.

N16H7M4R3 - October 20, 2019, 12:57 pm

Well, thank you very much, and when I put it in, I'll send a link here.

whoami404 - October 23, 2019, 12:57 am

hey buddy im interested, canu share the information in inbox?
