Thread: [Where is upcoming music in the new music app?](#)

Stephanie Medlock - October 20, 2019, 1:40 am

I was forced to update my phone to iOS 13 due to some issue with my phone screen and apple wiping it.

Now, I cannot swipe down on the music app to reveal the upcoming music. I used this all the time. Why has apple removed it? Even have Apple Music and everything, and now theyre basically making the music app worthless for me? Wtf?!

Load up the new Music App, hit "Browse" in the toolbar on the bottom and then scroll all the way to the bottom of the page and you will find "Coming Soon" along with a button to see all in that category.

You will find the coming soon option on the window after you click on the Browse option on the toolbar of your newly uploaded music app. You can find new updates on the see all in that tab.
