Thread: [Disable MyBB code inside code tags](#)

MavenGradle - October 20, 2019, 2:34 pm

It would appear like sometimes, using [code] blocks to utilize code formatting is broken. A fine example of this can be found here:

```
Code for (let i = 0; i < array.length; i++) {  
  console.log(array[i]);  
}  
hello
```

If I may request this change: would it be possible to disable other mybb tags inside code blocks? You can find the original text here in case you would like to verify for yourself why this entire thread is broken:

<https://pastebin.com/WYe1APde>

You can quote this to see why it's broken.

Omniscient - October 20, 2019, 7:10 pm

We may need to test against latest MyBB version because our MyCode parser isn't 100% up to date with MyBB. This is obvious a bug on their part. Inside code tags bbcode is suppose to be unparsed.

Thank you for looking into this. It's just a minor annoyance ? .
