Thread: [Free Snapchat Username Scraper \[ub3r/l33t\]](#)

Basstracer - October 20, 2019, 9:20 pm

Just finished coding a very simple username scraper that can scrape TONS of usernames. At the moment it only scrapes from one website but I am planning on adding multiple options and adding more filters like male/female and so on.

At the moment it only scrapes females, but adding a gender option wouldn't be much of a challenge either.

Are you guys interested in something like this? If so, reply to the thread for the download link.

Made in C# ?

[Video: <https://youtu.be/ZFjOBhf9BNQ>]

UPDATE 1: added the ability to copy a username to a clipboard. So you can click a username, then hit the enter key on your keyboard once the username is highlighted and it will automatically copy the username to your clipboard and you can paste it wherever you want (snapchat or whatever it may be).

UPDATE 2: Added the ability to filter male, female or BOTH. In addition, cleaned up the design slightly

Future plans:

- Plan to add the option to save usernames to a .txt file.
- Plan to add more websites to scrape from.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Just sent you the download link, also I added the ability to copy a username to a clipboard. So you can click a username, then hit the enter key on your keyboard once the username is highlighted and

it will automatically copy the username to your clipboard and you can paste it wherever you want (snapchat or whatever it may be). Please also leave a review if possible, other than that, enjoy unlimited usernames. ? ? ?

Sent link to you too man, read my previous reply too, added the ability to copy a username to clipboard (This can be EXTREMELY helpful in terms of automation) . Please leave a review if this worked for you, enjoy unlimited usernames! ? ?

Sent to both of you. Since quite a few people are asking for this, I don't want it to get too saturated. Therefore only l33t and ub3r will be receiving copies.

Please leave a review if it works for you guys.
