Thread: [I ride around with that Draco](#)

Who else rides around with that Draco? Here's mine. Nothing fancy. Don't beat me over the head with your SLR's and VEPR's, I'm not there yet OK?

I plan on tapping the rear trunnion for a two bolt set up so I can use a StormWerks folder and a KGB Stinger47 w/TailHook.

This is my favorite gun and I am proud of it's mediocrity. What the Hell are you guys packing? ?

Looking good there my man, may I ask you why you ride around with that?

Or did you only use that title because of the reference to the video? Because you should be careful not to get caught with such thing on your lap riding in your neighbourhood.

It is a reference to the song. I do however often transport this firearm around with me during my travels in a lawful manner that is in accordance with local, state, and federal laws. I also have a concealed weapons permit and could carry this in my pants if I wanted to because technically it is a pistol as defined by the National Firearms Act of 1938, but that would be silly. I would certainly go to jail for a felony though if I had this on my lap during a traffic stop if I wasn't immediately shot to death which would be surprising. ?

It's good to read that you're a responsible user and owner of this firearm, unlike some people who want to flex but don't think about the years of jail time that's coming along with abuse of your own firearms. Besides the fact that you should have the right paperwork.

It's nice to see your baby girl on your couch, but do you have a picture of your other firearms? Would love to see a collection.
