Thread: [wget connection refused.](#)

HardRock - October 21, 2019, 3:59 am

Hello All,

When i try to download from below command i simply get connection refused. Is there anything i have to enable on my firewall or router level ?

Code `wget -c --no-check-certificate https://37.187.191.187/lister/f94407a27c30cbcb94829364b4733c3e.zip -O BleachAnime.zip`
Looking forward for help.

Thanks. ?

the url is not working try other url

Hackoo - October 25, 2019, 1:55 am

The problem comes from the server :

Here is another method using Certutil command trying to download this file :PHP Code

```
<?php
```

```
@echo off
```

Title Download a file using Certutil Command

Set

```
"URL=[url=https://#/9hE]https://37.187.191.18[/url]7/lister/f94407a27c30cbcb94829364b4733c3e.zip"
```

```
Set "ErrorLogFile=%~dp0ErrorLog.txt"
```

```
::REM Just to extract the filename from the URL
```

```
for %%F in (%URL%) do set "FileName=%~nxF"
```

```
echo(
```

```
echo Trying to download this file "%FileName%"
```

```
Call :Download "%URL%" "%File%"
```

```
If Exist "%ErrorLogFile%" Start "Error" "%ErrorLogFile%"
```

```
pause & Exit
```

```
::-----
```

```
:Download <URL> <File>
```

```
Certutil -urlcache -split -f "%~1" "%~2">"%ErrorLogFile%" 2>&1
```

```
Exit /B
```

```
::-----
```

Thanks Hackoo i have tried but sadly i am getting Connection Timeout error. May be author server is not accepting any connections. i will keep on trying :)

really thanks for great help much appreciated ...
