Okay I will tell you how much you can earn for free on this:
you will earn 0.00013 every 2 days. this is \$15 per month (sure not that much)..but, for free, that's right.. for free on autopilot, all you need to do is withdraw to your wallet.
to earn more you can invest a little in the company and you will earn at a faster rate

You're all welcome!

Also there is this for you to try too

Sign up here and download the client, it's a new app for your phone and runs in the background.
The app can tell when you are not using your phone and gets to work at that point until you return.
I already make around \$5 a day from it and you can too, plus the more devices you can use this on (also runs on windows) the more you get.
Minimum withdrawal \$20 which you can make in 4-5 days on autopilot.
Use my link to get an instant \$1 in your account
Enjoy!
