Thread: [Youtube Live Stream View Bot - HQ](#)

The-Real_Devious - October 24, 2019, 8:17 am

Hello,

I am offering software application that can deliver upto 500 Viewers live on stream, i can show proof before purchase if required.

Software can deliver a constant 100-200 Viewers or rise upto 500-600 Viewers for around 5-10 Minutes then it will drastically drop as this software runs by scanning and scraping hq proxies.

You can easily run this program on you're live stream or anyone else easily for 100-200 constant viewers for hours and hours. the inconsistency of viewers will drop when you set threading over 200.

Software is sold as is their is no subscription their is no lifetime subscription.

You can run this from a pc or a server its coded in python so if you do not have it installed you will need to install it the version required for this software is (3.7).

PRICE: \$125 - SOFTWARE PURCHASE

Contact me at HOUDINE#7389 on discord or in HF Messages.

I Can show proof of the software working and i can have others vouch for me also i have provided my services to youtubers that have gained thousands of subscribers due to this software putting them in the recommended.

Any trial for this ?

Where you can find reviews ?

xlevelx - October 26, 2019, 8:35 am

are you provide demo test or something like that
i am interested thanks

Wrong forums to post this in as it looks like a sales thread not a market discussion, you can't even find the appropriate forum let alone develop a bot yourself.

So assume that you are proxy selling or selling a free bot?

Do you have any pictures perhaps, maybe a video and proof of streams?
