Just browse daily/lightning deals on Amazon to see if you can pick up something you're looking for cheap.

Get some LED color changing light bulbs for your entire house. You can link them with WiFi and turn on and off lights from your phone, freakin' convenient. Trust me.

I bought Phillips LED lights. They connect to your WiFi network and the app you download it's called WiZ. Freakin' convenient, they are just like \$12-\$15 each.

Oh, well in that case..... be impulsive and go in and look at everything in that price range. Find whatever you wouldn't usually buy yourself and just buy that lol
