yup. i got it. its the same name as here (Eruil). i belong to a spanish forum named Elotrolado. i took some files of your rgloader 17526 and i mixed it with 17544 dev systemfiles (only 2bl patches btw) . that devkit nand runs well. i share it with all people (free) but i have some questions about how to patch xex's . i've sent you a discord PM . thanks, you released rgloader 17544. you rock dude

ive injected Xell mod consoles 994 (benmitnick ver.) and it doesn't boot , thats why i posted that comment in your rgloader 17526 post.

lets say that i m fan of imtwizted 24/7 and you (rgloader devs)
