Thread: [Navigation Changes](#)

Xerotic - October 29, 2019, 12:53 pm

Desktop

Under the "Welcome back, YOUR_USERNAME" text the game link was changed to a dropdown menu with a few different Bytes related links. Hack Game, Lottery, Scratchcards, Sportsbook, Slots, and Blackjack.

Mobile

Clicking your avatar in the top left of the screen will now open a menu with 4 different tabs. Each tab has a collection of links. The tabs are: Account, Forum, Game, and Market

Any thoughts on the new navigation? If you notice any oddities then I ask you to please clear your cache (CTRL + F5) before making any bug reports.

I hope that new members won't think this forum is full of gambling :P

i think we are well known enough as being a hacking and information forum with a big marketplace so that shouldn't be an issue as they aren't the first things a new member will see, they will find it through exploring :)

SUI-3183372 - October 29, 2019, 1:16 pm

Looks nice and clean. Nice work.

Bastille - October 29, 2019, 1:17 pm

I never went to the other HF's games before that because I never found them. Good feature added in my opinion

Just played some slot, won some bytes !

drip - October 29, 2019, 2:08 pm

I was looking for User CP for like 5 minutes...

I think it's better settings to be changed to User CP. ?

Pyro - October 29, 2019, 2:26 pm

I like how everything byte related is now under 1 icon, before I had to go to extras page for blackjack/slots

flavoral - October 29, 2019, 2:31 pm

Looks good. I hated having to go to Extra then search for what i needed

EDIT: this is my 6666 post lol

Vitani - October 29, 2019, 2:36 pm

Looks and works great! It was actually slightly annoying how it was before so this way is a lot better!

SoulZeh - October 29, 2019, 3:00 pm

I've just noticed that, I was like "ooo spicy" looks very nice in my opinion, good work.

Sheep - October 29, 2019, 3:07 pm

I liked the previous way more, this will take getting used to. Couldnt find 'new posts' lol

Game - October 29, 2019, 3:17 pm

Amazing work buddy!

This is so much better than it was before. Going to the Extras page to find everything was a pain in the booty!

Good job!

SIM-403479 - October 29, 2019, 3:49 pm

Just noticed it randomly. I'm a fan. Good work.

???? Shana - October 29, 2019, 5:36 pm

Big fan of the new game cp dropdown ?

Boomer - October 29, 2019, 5:40 pm

"View new posts" requires 3 clicks rather than 2 on mobile now. This is unacceptable!!

Jk, I like the layout.

Sir - October 29, 2019, 6:24 pm

Under the Post Thread/View Posts section you should add Blogs. :)

NoSuchAgency - October 29, 2019, 6:25 pm

This updated fixed all the issues I was having with the previous layout.

Jk, I like the layout.

Imagine if the binoculars icon was a link for that page.

Motusora - October 29, 2019, 9:23 pm

thanks for all the hard work . ?

Evanescence - October 30, 2019, 5:31 am

Is there an option for the mobile users to switch from convo to PM from the topbar?

As I don't usually use convos currently and if I get a new PM, I have to manually navigate to see if there is any PM.

Kill Joy - October 30, 2019, 11:40 am

On mobile, if I am in my notifications dropdown, I have to click it again to close it in order to click my avatar icon to get to that dropdown menu. Clicking on the avatar doesn't automatically close/override the notifications dropdown. I feel like it should, but that's just an opinion and not sure how it was intended and don't mean to be picky.

On the other hand, I feel like notifications have become a lot more consistent in its alerts, so thank you. There was, for a time, where I still wasn't receiving some quotes and thread replies.

Great. BTW I'm unsure if anyone has noticed but notifications are our first attempt at using "smart time". In other words the timestamp will update even if the page is sitting open so when you view the notification panel it should always be accurate.

Yin Yang - October 30, 2019, 2:47 pm

I like the mobile view and options.

But I'd recommend to make the 4 icons to stick out more.

B0Trun - October 30, 2019, 2:48 pm

I love this option and easy to navigate .

Thank you Mr Brilliant

Any particular reason cryptogame wasn't included?

<https://hackforums.net/cryptogame.php>

Seems like it's the only bytes feature not in the drop down menu

test - November 2, 2019, 2:56 pm

It's quite large and doesn't really fit with the grey theme. Good idea though.

iNviZ - November 2, 2019, 3:59 pm

Woah love this change, well done bro.

Cooligan - November 3, 2019, 1:05 am

To be honest at first I didn't like it because I had to click two buttons to get to the Hack Game when I'm used to only clicking one, however; after having used the new game drop-down menu (I browse on desktop) I actually love it now. The only reason I started to use the Sportsbook is because it's part of the drop-down menu now so I'm constantly checking it because it's right there and convenient.

Great change/update Xero.

This is very nice use to be a slight hassle tryna to enjoy all the new extra features we've been getting lately, thanks for this useful revamp!

Wafflemonger - November 3, 2019, 12:23 pm

I like the idea of the change, but I what I don't like is now there's like 5 or 6 different fonts/font sizes when you click that drop down in a very small area. I mean, I don't play the game too much anymore so I don't envision it impacting me in any way ... just something to point out, to me, it looks messy.

All those links are the same font and font size.

(Nov 3, 2019 10:25 PM)Xerotic Wrote: [\[CITE\]](#) All those links are the same font and font size. I mean, you have the drop down 1 (large, bolded) size, the icons next to it are dwarfed by them, "Welcome Back, Wafflemonger" is bolded but smaller font, "You last visited" is not bolded, but same size, then you have the forum headers, which is bolded, but a different shade, then you have the person's name.....etc etc. It would be nice to have like 3 or 4, instead of 10 hahaha.

Vitani's Mate - November 3, 2019, 11:34 pm

So that's why my compass doesn't work.. =(
How am I going to find treasure island?

Also I could use my map to follow the navigation..

?ytes - November 4, 2019, 9:05 am

This makes things lot easier to navigate. Earlier I used to type scratchcard.php when I needed to go playing scratchers.

Just played some slot, won some bytes !

Nor did I then again I can't say I even bothered to look for it - I'm going to give "hack game" a try.
