Could you please enlighten me on how a closed-source paid program is supposed to be for educational purposes?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

It works on native files only (No .NET). You can use it with anything you want, just not for malicious purposes.

Vouch for Prime Protector;

Works just as described. Not many native crypters with injection and startup like this one. Great FUD.

Close this thread and Open a New thread.

You will loose sales if you dont have proper info on the main Post.
