Thread: [\[CSGO\] Reportbot work?](#)

N3k4T - October 30, 2019, 3:43 am

Hello,

I would like to know if the reportbot still works or are patch?

Cordially.

Menalix - October 30, 2019, 5:48 am

Works for me.

Lots of people report it doesn't work though.

The other day I was playing a community server where I am admin. People reported one of the players on the server was cheating, so I spectated him, but he would hide it every time. Then one guy said he played a mm-game with this cheating guy 2 weeks ago, where the guy was obviously cheating. I got the match id and reported him and after 30 minutes, our server kicked him, because he had been banned.

Thank you for your message, but it does not enlighten me much.

me much.

yeah he isnt very enlightend, thats a public known fact.. what he wanted to say is that it doesnt work but in his esoteric world it does work when he believes strong enough

Well it works IMO, simple said.

The API is still responding to report requests. If it was out of service, they would respond with a status code, reflecting that.

A possible vac employee (John McDonald) said on reddit it isn't working though.

No, people say it does but it doesn't. Valve even posted on a reddit thread about this

As @Jinx said, report bots don't work. It's a "scam".

If done right, they will send a player to overwatch quicker, sure, but if you are not cheating or you are hiding it very well (no wh but only low fov aimbot and triggerbot with awp) then you will NOT get banned even if you get reported 1000 times. And the way the community of CS is at the moment, if you are rage cheating and you are obvious YOU WILL get banned eventually anyway; it just MAY take a few hours more if you do not get report-botted.

Therefore, unless you hate someone THAT much better invest your money into something different.
