Vouch for OP, he's one of the only people on HF I'd hire if I needed something done. He also has a degree in design and his work is exceptional compared to anything you'll find on HF; for the quality of his output on the regular market you'd be paying double the prices quoted on this thread, easily. Absolute bargain.

Really hope you land a full-time position in an agency or launch a fully-fledged freelance business - you've come on so much since I first saw your work on here a few years ago and I was absolutely amazed by the quality of some of the projects on your site!

It's honestly an honor to receive such a compliment from someone like yourself who is highly skilled and talented as well.

I appreciate it very much, I'm graduating in just a few months and will hopefully launch a studio as things are going very well at the moment.

Thank you again ?

"We have gotten a lot of compliments on the design especially in the beta. Right now we are focusing on getting more feedback related to features but there have definitely been no complaints

relating to design. We are very happy with the design. We are looking at getting a cash injection soon and if that happens we would love to work with you again on creating designs for the new features."

5-page website costs 5k? I mean this is a bit over-priced to be honest regardless of whatever you are going to offer.

If you can lower these prices by a HUGE margin, let me know.

It's not really overpriced. This is HF, so it doesn't surprise me to being told this on a regular occurrence.

Some websites I have worked on were indeed 5k because they are projects that last about a month. If it's 2 months of work, it's expected to be 8k-10k. Somewhat similar to the average full-time salary of an employee in my field.

However, as the thread states, 5 pages start at 2.5k and can be up to 5k depending on complexity and estimated time. I also charge prices lower than other freelancers in the industry, usually, it starts at 10k for some of the people I am in touch with.

I'm not for everyone, I'm for the few percents of the people [on this site]. I work with small-medium sized businesses and entrepreneurs who are willing to invest, people who want industry-standard work.

In the industry, my prices are pretty common. You can get paid \$400-\$600 a day as UI Designer/UI Developer if you work as a Contractor for some organizations.

Hope this makes it clear and thanks.

Alright. Sounds fair. I saw one of your websites and it does look nice to be honest.

Will let you know if I have people who are up to pay such amounts. It's rare to find them on HF. Just a word of advise.

I appreciate your concern, however I've been freelancing for a few years now and I am getting projects on a regular basis.

My clients are not only from HF, but also LinkedIn, word of mouth, and general social media. You would be surprised to see how many clients I have gotten from HF. Unfortunately, not all of them have accounts.

Thank you.

My prices will never go lower. I'm going to raise them again very soon since I am about to graduate and I am currently learning React. Once I have that down and I make projects, it will be time to do so.

You are right if people want someone with experience and actually takes the required amount of time to deliver quality work, then you have to pay. I regularly have calls with my clients to update them and show screenshots on what the creative direction is. That's all part of the service.

Thank you for your kind words.

I'm glad to announce that the organization I have been working for the past few months has now released the website I have designed and developed for them.

OP and I have been working hand in hand on a beautiful website. The near final result is immaculate.

You may think: "Wow, it is an expensive service." To that I say: Yes, it is VERY expensive but Lamborghinis and Ferraris are 'expensive' too. Mister Slyther's work is the equivalent to Lamborghini or Ferrari in his area of work.

Amazing artist.

Without a doubt the best Front end coder and Designer here on HF.

I have tried many but only Mister Slyther has been able to give me the support and quality as i required.

website: <https://websec.nl>

BIG VOUCH!

For anyone willing to start a company, Mister Slyther won't just develop your front end and give it the best design he will also keep SEO into account and make sure your website is W3 Validated (no HTML errors).

It has been a pleasure working with Mister Slyther, and i will defiantly return for more in the future.

Total price paid: \$3500 , t.b.h. worth every penny!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Mister Slyther - *December 7, 2020, 5:21 am*

Important - I am not accepting any new projects that are less than \$2,500 due to being employed full-time.

So I am only making time for projects that are medium to large scale.

Large scale \$15,000+

Medium is the minimum of \$2,500 - \$5,000+

This had to be done to allow a balance of both extra projects and my fulltime work.
