Actual Machines??

I tried PC registration (win10) and it straight out denied me. Tried VM, denied, tried Emulator (bluestacks and memu) in VM, denied, like dafuq.

All mobile devices accepted.

Might go down to the pawn shop and buy a bunch of cheap broken down phones

And fuck man, that must suck.... How did you even miss a day??

Edit: I'll wait for him to return, just in case

Ahhh that might be why because I would've had the desktop and VM number flagged. I'll try again later. Thanks for the tip bro

You can still claim.

Max of \$500 per number, currently approximately \$50 of XLM per account for next drop in two weeks. Continues monthly until reached limit or surplus runs out.

I highly advise everyone transfer your ill-gotten gains (if you're spamming it) in paper key form.

Picked up a new job at local deli near me. Should be a good November, fingers crossed.

Bastille - October 30, 2019, 12:02 pm

My November will be a good month because this is a month less until the end of the year, a month less until I'll put my balls on the table at work and ask to earn more.

Really excited to be honest ?

Nice. Try not to be an employee for too long

Oof, hate working for someone. Ripped off over 3k a few years back when working. One employer didn't pay me at all -_- , owed \$1300 from him alone

November is freakin' cool, chilly weather up here, time to start hibernation and spend more time with family and with yourself. I love it.
