Thread: [why isn't my menu centering?](#)

craigOwnsYou - October 30, 2019, 5:25 pm

I'm making my Dad a website. I have this CSS code and I am trying to center the menu before I get to everything else. The reason is I'm trying to get a basic structure going to work with for the site.

I looked it up on Stack Overflow a couple of places and made some progress, but the menu isn't centering:

```
Code #vcontainer {  
  display: table;  
  height: 100%;  
  width: 100%;  
}  
  
#hcontainer {  
  display: table-cell;  
  vertical-align: middle;  
  text-align: center;  
}  
  
#content {  
  display: inline-block;  
  border: lightGray 1px solid;  
  background-color: lightBlue;  
  text-align: left;  
}  
  
#menu {  
  justify-content: center;  
}  
  
div.button {  
  float:left;  
  margin-right: 20px;  
}
```

Lol, once I get a good structure for the website before I continue to the next portion of the website.

Hoping to add in more pages but for now I'm just looking to get a basic structure going.

But first, I need to get the menu working.

Please advise.

UPDATE!!!

I got it working!!!

Nevermind.

Well, it'd be nice to post a solution for other people that might face the same or similar problem. ?

Also, for future reference: please also post the relevant HTML.

OK, will do. Except that now my code has another problem with a different feature. But here is my current code:

```
Code #vcontainer {  
  display: table;  
  height: 100%;  
  width: 1000px;  
}
```

```
#hcontainer {  
  display: table-cell;  
  vertical-align: middle;  
  text-align: center;  
}
```

```
.menu {  
  justify-content: center;  
  text-decoration: none;  
}
```

```
div.button {  
  display: inline-block;  
  margin-right: 20px;  
}
```

```
.button a {  
  text-decoration: none;  
  font-size: 15px;  
  border-radius: 20%;  
  color: purple;  
  font-family: fantasy;  
  font-weight: bold;  
  border: 5px solid purple;  
  background: yellow;  
}
```

```
.button a:hover {  
  border: 10px solid blue;  
  background: cyan;  
  font-size: 25px;  
  color: blue;  
}
```

```
#lawOfficeName {  
  justify-content: center;  
  margin-top: 50px;  
  font-size: 50px;  
  font-family: fantasy;  
  color: cyan;  
  background-color: navy;  
}
```

HTML code will be posted soon as well. I just have to find time to get my dad anonymized in the code.
