The process is automatic and very simple to use! Everything was instant. Was done in about 3-4 minutes from going to the website to having Spotify premium. Just make sure to read what's on the screen and you'll be fine! Thanks a lot for the cheap Spotify!

It wasn't automatic because you bought manually...

Purchasing through Shoppy is instant and automatic.

Huge updates were pushed to the site, you can now automatically create a new Spotify account (US) if needed, to avoid the hassle of signing up and to let customers from rare countries use the

service!

Yikes. At least I'm not blocked by Chrome yet lol. But are you sure it says trojan? Because there really is nothing to download on the website, it's all web based.

Yin Yang - November 26, 2019, 4:39 am

Do you offer a warranty at all?

Markovnikov - November 26, 2019, 6:11 am

OK, so I purchased and it works to add you to a family plan. As long as the plan doesn't die then it's a great deal. If it dies, well then you lose all your playlists and such which makes it not a worthwhile adventure, so we will see what the longterm outcome is.

Aim - November 26, 2019, 4:54 pm

Lifetime (of service) warranty.

Enjoy your Premium. If that were to happen, you can easily transfer your playlists from one account to another on <https://spotify.one/backup>, and if you're too lazy to make a new account you can automatically create one on <https://spotify.one/register> :)

How safe is this for my personal Spotify account?

Also, my country isn't listed on the website. Is it okay if I change the country on my already made account to US and then use a key?

Zero - February 23, 2020, 3:58 am

I think I already got like 5 accounts from you, I have to say, this is the best service I had!

Everything is automated, if there's an issue with the account it takes literally 2 minutes to fix everything and you can do it by yourself.

Thank you very much for this!

For anyone who thinks about getting an account from this guy you 100% should do it!

As someone who already got accounts from him, he has a service to make you an US account. Then you just change all the info as you like (Email,Password).

If you worry about playlists and such he has a tool to export it all from your account to a file and then import to the new account. Takes about 1 minute to do.

Service is 100% automated and everything is explained + he's very helpful.

I don't think you should hesitate!

From my experience after like 2 months of using 4 accounts I had to replace the whole account only twice. But with the steps above it takes 5 minutes. He automatically creates you a new account, you export + import all your playlists and just remove the email from the old one and change the new account's email to the same one.
