Thread: [Hawkeye Keylogger/Crypter needed](#)

SIM-4049613 - November 3, 2019, 12:22 am

Hello mates, I need a good Hawkeye Keylogger and a working Crypter for it. I look forward to anyone who can be of help.

Bentoro - November 10, 2019, 6:04 pm

i can help you setup a good keylogger, fud it and exploit it to doc file ready for usage.
i do this and we test all ok before payment.

contact me on : Jabber: bentoro@jabb.im | Skype: bentoexploits@hotmail.com

That's expensive I could get 1month doc exploit here for 70\$, And crypter 45\$ for one month and I've expert rat. So if you're selling stub it shouldn't be expensive like this.

exploit you get for 1 month \$70 are macro or pop up etc shit. and mostly not fud. secondly. the crypter you get for that cheap are shared stubs and never fud and never fud on runtime. and exper rat you use is free out there. you do not use free stuff to compare paid stuff. there's a reason why its free and there's a reason why it will cost money.

there are product or service you get for less than \$30 and others you can get for \$3000. its all about quality.
\$200 for a full botnet setuped, fud and exploited ready for use is cheap if you want some good quality.
