Thread: [bootstrap help](#)

vyactor - November 3, 2019, 3:48 am

So, basically I created a navigation menu with bootstrap. Everything looks fine but when I resize my browser to check its responsiveness, it just does what it is supposed to (display an icon accordingly). But when I click it, nothing just happens. It is supposed to get dropped down.

Code:

```
Code <div class="navbar-collapse collapse">
    <ul class="nav navbar-nav navbar-right">
        <li><a href="index.html" title="Home">Home</a></li>
        <li><a href="#" title="Gallery">Gallery</a></li>
        <li><a href="#" title="Contact Us">Contact Us</a></li>
        <li><a href="#" title="About Us">About Us</a></li>
        <li><a href="#" title="Message from the Founder">Message from the
Founder</a></li>
    </ul>
```

```
</div>
```

Do I need to create media queries for navbar-collapse for it to drop down when I click the icon?

You cannot use HTML and CSS alone to do this, so if you don't have the Bootstrap javascript included, you will need to get that. I also don't see the button included here, so if you have a typo there, there is no way for us to know.

See <https://stackoverflow.com/questions/20719607/bootstrap-3-navbar-collapse-button-not-working> to make sure everything is correct with the collapse button.

Code <section class="header-wrapper navigation-wrapper">

```
    <div class="navbar navbar-default">
        <div class="container">

            <div class="navbar-header">
                <button type="button" class="navbar-toggle" data-toggle="collapse"
data-target=".navbar-collapse">
                    <span class="icon-bar"></span>
                    <span class="icon-bar"></span>
                    <span class="icon-bar"></span>
                </button>
                <a class="logo" href="index.html"></a>
            </div>
            <div class="navbar-collapse collapse">
                <ul class="nav navbar-nav navbar-right">
                    <li><a href="index.html" title="Home">Home</a></li>
                    <li><a href="#" title="Gallery">Gallery</a></li>
                    <li><a href="#" title="Contact Us">Contact Us</a></li>
                    <li><a href="#" title="About Us">About Us</a></li>
```

</div>
</div>
</div>

</section>

Oops, there you go. I'll give a look at that link too soon. Any help from your side is even appreciated. What do you mean by bootstrap javascript? Isn't bootstrap.min.css is the file that I need to have?

Edit: Okay, so I was the dumb one. I added the javascript files and it worked out. Thank you for making me remember it xD. I appreciate your reply.
