Vouch copy? I will give a detailed

sys123 - November 5, 2019, 6:26 am

Can I make the startup macro option pop up in the middle of the doc file?

Xamarin - November 5, 2019, 3:36 pm

OP sent me the vouch copy (with some delay), and I will indeed vouch for the legitimacy of his product.

Here is my full review for it:

Functionalities - 8.5/10

This is the most important part of a review of such product, since this is what most customers should care for. 404 keylogger has a lot of functionalities that you 'll expect from a keylogger (such as fake msg, assembly changer, size pumper etc) + and others that you wouldn't expect, such as the ability of signing your builds with your own signature. The reason that I don't put a 10/10 tho, is that I found out that if you have a browser open, then the stealer of the keylogger won't work. Technically wise this is natural, but an option that will immediately close the browsers forcefully to implement the credential stealing, SHOULD be present in my opinion. Additionally, I would like to see other ways of persistence to choose from. I will like to put a disclaimer here, and say that I didn't have enough time to check all features before my time expired, so I cannot tell my opinion for all the features of the keylogger. Nevertheless, the features that I tried worked perfectly.

User Experience - 9/10

User experience is a complicated topic, but if we exclude some UI discrepancies (that I will go further into), I can say that it's pretty good. The software doesn't have an installer, and it's portable. Additionally it auto-updates as I saw, so everything is fine in that regard. Furthermore, I didn't found

any disruptive bug on the application itself, and everything worked smoothly.

Support - 6/10

I didn't encounter any technical issues while using the product, so I didn't actually use the support of OP. Now the reason that the support has that bad rating, is the fact that:

After we had everything settled regarding the vouch copy with the OP, he took several days to actually deliver it.

After my vouch copy expired, I offered to give him some technical advises regarding a topic that I am very familiar with (I won't mention what it is), and he still (2 days later) hasn't answer me.

This makes me think that the OP is probably busy, and he does not have enough time, which could make the support very slow if the number of clients increase. Of course, this is one of the things that I experienced, and it could really be just a coincidence. Nevertheless, I am obliged to document it.

User Interface - 4/10

Yeah, the rating is not very good for the UI. As of now (11/13/2019) the UI is pretty bad. To give you an idea, this is the screen that I saw when I first opened the application:

Spoiler ([Click to View](#))

Things got worse as I opened more and more of the windows of the application:

Spoiler ([Click to View](#))

As you can see, I was horrified by the UI implementations, which is a shame since the product seems nice for the (initial) stage that it is right now. On the other hand UI is something that can be fixed, and I mostly post this "UI Critique" in order for the owner to actually see and improve it.

Overall, I would put a nice 7.5/10 for this product. I believe it has things that can be improved, but it has the potential to become a very good HF product.

GLWS OP ?

Dragonvixs - November 7, 2019, 3:53 pm

can i take a vouch copy as well if you want, please note I will write everything in detail and I will be objective.

If you like that, send me a PM.

donat2013 - November 8, 2019, 11:41 am

Looks nice, does it recover foxmail?

Overall, I would put a nice 7.5/10 for this product. I believe it has things that can be improved, but it has the potential to become a very good HF product.

GLWS OP ?

Thanks for your time, about the features is not important cus the logger need a crypter also all crypters have this features, for a keylogger just loggers and recoveries and delivery is very important, about the UI you right it have some problem but not important cus everyone just want the output perfectly thats all, About the Support am worked for new features also you can see it on last post on my thread, always i have biggest and best support with share screen you can ask my customers in outting HF, about the recoveries mate recoveries works if the browsers will opened PM me i can show you with share screen, anyway Thanks for ur time to testing my product.

ramsey8 - November 14, 2019, 12:04 pm

so far, so good i must say this product is a bomb. i love this keylogger, the code give 100% support at anytime. I rate this code 10/10,
404 picks up every single things in any system it runs on. so guys let go there....!

Razer Coder - November 14, 2019, 12:16 pm

All Logs and Passwords come with .txt file

FTP Screenshot Logger Added.

Stanley - January 1, 2020, 5:53 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
