I'm not sure he is requesting for FTP software? Or just access to other peoples hosting?

What do you need exactly OP

Basically it appears he is inquiring about access to cpanel's in a list with login credentials.

Yes, I request a list of cpanel's with login credentials, for backlinks promoting. Basically i upload my page on their domains to promote my business. Anyone has a list of hacked or created cpanels with good reputation on google for fast indexing please PM so we can talk.

Thanks!
