Thread: [To our special flamers, and for your entertainment](#)

Perfect - November 5, 2019, 2:55 pm

Introduction

What are flames?

Flames are violent and aggressive responses to Email messages, newsgroup messages, IRC messages or any other form of communication over the Internet or any other computer network. Flames usually consist of bad words (e.g. Shut the fuck up, R a v e N!), swearing (e.g. R a v e N, you are a complete asshole!), cursing (e.g. Go to hell, fucker!!), censorship-like marks (e.g. You can take your tutorials and shove them up your !\$^*&!! Why wouldn't you go and suck some @\$(&!@\$)^*!!!), threats of physical violence (e.g. You are about to enter a world of pain, you son of a bitch!! I'm gonna kick your head until it falls off and starts bouncing and rolling down the stairs!!) and capital letters (E.G. FUCK OFF, YOU STUPID BITCH!! GO GET A HUMAN FACE OR SOMETHING INSTEAD OF THE HIDEOUS-LOOKING ONE YOU HAVE!!).

WHAT ARE F... Sorry, forgot to turn off the caps lock button. What are flame wars?

Flame wars occur when two or more different parties engage in a violent argument that, in a certain stage, turns into what is called a "flame war". A flame war would continue until one of the parties would withdraw and admit that they were wrong, if the flame war is killed by the moderator of the discussion mailing list, message board, IRC channel etc' or if one of the parties gets tired and stops responding to the other party's flames.

When and why can/would I get flamed?

You can and probably will get flamed when you ask a number of questions or post a number of comments. I've sorted these into several groups and given examples for each group.

1) Begging.

Please OP me!! PLEEEEEEEEEEEEEEEEEEEASE!! P-L-E-A-S-E!! I'll do ANYTHING!! Can anyone please send me this file/URL/whatever? Please? PLEEEEEEEEEEEEEEEASE? Please please pretty please?

2) Asking people to do things for you.

Please hack this server/PC/website for me.

Please help me hack a friend's PC.

Please help me find this and that (unless you say that you've been searching this and that for a lot of time and give a short list of some of the places you've tried, in which case you probably won't get flamed, although most chances are that noone would help you, unless it's a special help board like mine, in which case the moderators would probably help you).

10) Not reading the topic message in IRC channel or the readme files, FAQs and help files in message boards and discussion mailing lists, thus asking silly questions and acting like a total jerk.

Hey, who are the moderators?

How do I use this bot? How do I use this feature?

How to avoid getting flamed

- a) DO NOT make any of the mistakes and flame-starting actions listed above.
- b) Think twice before doing anything.
- c) Make sure you know what you're talking about.

What to do after you've been flamed

In most cases, it's better to leave the flamer alone and quiet-down the issue. In some cases, you might have to reply, in which case you must find a way out. While you do so, try not to flame anyone back and make sure you don't give too many reasons for why you did this and that or said this and that, and only give REEEEEAL GOOD reasons.

Flaming-related concepts

----- /dev/null - if you don't know what this is, you probably never studied Unix very thoroughly. Everything sent to /dev/null disappears from existence. This feature is very useful in many situations. For example: if you want to run and kill all the output and direct possible errors to /usr/share/logs/log.txt, you can type this: `command > /dev/null 2>/usr/share/logs/log.txt`

`command > /dev/null` or `command > 1>/dev/null` will direct all output (stdout - Standard Output) to /dev/null. `command 0>/dev/null` will direct all input (stdin - Standard Input) to the command to /dev/null. `command 2>/dev/null` will direct all errors (stderr - Standard Errors) to /dev/null.

When someone tells you to direct your flames to /dev/null, he means that you'd better shut up.

STFU - Shut The Fuck Up.

FAQ - Frequently Asked Questions. A file that contains... you've guessed it!
Frequently Asked Questions.

RTFF - Read The Fucking FAQ / Read The Fine FAQ.

* EOF - End Of File (not so flaming-related. Skip two lines ahead to see why I added this entry).

- E.O.F -

WHY IS THE THREAD CENTERED^?

DNA - November 5, 2019, 10:15 pm

Hmmm.

Welp, I've wasted 5 minutes reading this thread and that was the plan so, gj op lol
