Thread: [Anubis 2.5](#)

w115t3r - November 5, 2019, 3:04 pm

Hello, can anyone tell me how to set up anubis? I like trying new software/apps and want to give this a go in my lab at home.

I have set it up following the video tutorial, have it running but how do I link the apk to the panel?

I mean, how do I get the panel to build the apk via linking it or what edits do I need to do within the apk that is provided?

Thanks

java, php, C

Spynote is still actively being developed, i know the author, he is slow but he will update someday

what part of spynote u need updated exactly? like new feature?

lathack - November 8, 2019, 12:25 pm

Yea more stable and "fud" how? i will research :D

I tried Anubis from source , it's working good , in keylogger I get log but not fine way ,
If you know Java , then u can understand , window changed , text_changed and focus like , terms,
So , main functionality in keylogger depends on these code, time interval also not functioning as it sets,
As we understand it's author not focused on only logger as it's overlapping apk banking bot ,
So , only sms intercept , contacts, installed app working smoothly,
some how , my personal analysis is that , fafa.php making some obstacle..
In short , if somebody can help me out for proper keylogger functionality then help me plz..
My tg is @Techomaster..
Tq..

Sir,

I want your help , as you posted you have experience in Java and Anubis bot,

I have source of Anubis , it's working fine , but

In Keylogger function , I am not getting all captured keystrokes,!!

I edit service accessibility.java , but not all logs grabbed to panel ,

By d way , I want to solve 3 things

- 1) Getting all logs from , Text changed , Focus and Clicked code
- 2) Set Time interval for getting logs at given time..
- 3) Keylogger should be alive after giving command once ..

Plz help me out sir ,
I am trying since last 2 months as I am a not a professional coder,

You can contact me at t.g @Techoexpert

I can share screenshot of my panel and other Java file too..

It will be pleasure from getting positive response ..
