Thread: [Snapchat will work now only on its latest version.](#)

BlueRabbits - November 6, 2019, 11:42 pm

As I said in multiple threads and different groups and communities, snapchat app will go down. We gotta find new ways and new workarounds for this, or we are going extinct.

From today, Snapchat will work only it is latest version. All of the people Im talking too, app crashes continously. Well, maybe not all the time its latest version, but the latest version where importing from camera roll (the memory trick) isnt active anymore.

Guys, change the platform, or find workarounds. They are coming for us.

Coping - November 7, 2019, 12:11 am

Better to just buy a modded app of some sort that some people sell on here if the memory method stops working. Snapchat is big af and many people have it, finding other platforms atm is not really an option

Yea I know, I use the modded thing from atro, but still shows on my story : "12m ago from" thats all.

Ah I see, so the modded apps are only for live snaps not live stories? Tbh live stories are much more important imo

Are for live stories, but in my case, this happens. Depends on the version of the app tbh

This is the beginning of the end for Snap tbh, its not gonna work like it does now, you won't be able to post NSFW stories for much longer as they are becoming much stricter due to wanting to be more

advertiser friendly. I suspect in future it will be easier to just directly message all people who have just added you. On the topic of NSFW stories, i'm not sure if private stories will also be affected, we will soon find out I guess.

Yea you are right. Unfortunately.

They should have stucked to NSFW content since insta it's coming from behind with their stores and there you are more open for the public. On Snapchat on the other side, they were be using the NSFW to grow, now ffs, they wanna go off that... Fucking CEO bastard.

tbh it was always gonna happen, they outgrew the need to rely on NSFW content and decided they don't want it at all anymore.

Yea, i wish they'll go bankrupt completly. With my whole heart. BASTARDS.

WhyYouKeepDoingThis - November 7, 2019, 1:54 am

I have the latest version of Snapchat and the memories thing works what the fuck are you even talking about.

Pink Guy - November 7, 2019, 2:05 am

It's still working on old version.

I dont even frickin' know why you can do this sh!t. 10.65.5 snap version?

(Nov 7, 2019 03:05 AM)Pink Guy Wrote: [\[CITE\]](#) It's still working on old version.

Then, you are a lucky man, partner.

tomi111 - November 7, 2019, 2:49 am

I have 10.67.0.0 version, and everything works good (astrosnap).

???? - November 7, 2019, 2:56 am

It still works on old version and I still use phantom tweak for my snaps lol.

for my snaps lol.

Which version are you using my friend?

Chronicon - November 7, 2019, 6:26 am

I'm using a non updated version of snap with Juxstins app fine still, no issues yet for me

BlueRabbits - November 7, 2019, 6:28 am

Aklimczak522 - November 7, 2019, 6:48 am

I am not forced to update yet and memory trick still works.

bruisedwitch - November 7, 2019, 5:58 pm

It's saying "from" for me too on snxp, is this a new thing? I swear it never used to say it prior to a few weeks ago and yeah buyers are def starting to notice

Pancake Boat - November 7, 2019, 6:09 pm

Idk. I'm using 10.69.5.72 no tweaked/modded apps. Just my own dumbass workarounds I've been using for a loong time.

No problems for me.

I hope they fuck it all up. Less competition for me ?

SIM-4952659 - April 21, 2023, 4:44 am

havent been at it in a while, thanks!
