How hard is it to be whitelisted on the servers you play on? Are they English based? Last question, what are the factions and what're the things you can do around the server as a civilian.

If you're mature and know how to RP it's not hard at all.

Trolling gets you banned really fast though.

You can do alot as a civilian.

But a few examples for jobs would be:

Taxi driver

Trucker

Mechanic

Cop

Ambulance

Lawyer

Post office

Banker

Miner

Fisherman

Journalist

Tailer

Slaughterer.. and the list goes on.

It's alot broader than Arma 3 in general

Do you get assigned a role?

No,

You apply for the job(s) you would like to roleplay with or the job that fits your character the best.

You apply in-character.

Hey I love playing Arma 3 Life but i personally think you should try out the Anzus Gaming Server, it has a lot of addons and a huge player basis and map and it's much more interesting to play than the usually Altis Life Servers. You have a bunch of different things to do and the Roleplay there it's much more intense and legit.
