REVIEWER PRODUCT'S SERVICES

Review services are very strict service. An analysis of the total product will be carried out, including binaries if the product has them, to give the best detail of a review to guarantee the product. (With this type of reviews, it saves you many unnecessary questions in your threads about your product to sell.)

- +Service of review of products for users with a great analysis and report with their corresponding post of analysis and revision in sales thread.

All services will have a reasonable price study for the user that demands any of them including their

corresponding contract here in HF.
