Thread: [My business plan](#)

sinisterrr - November 7, 2019, 12:11 pm

I need some advice on my plans x)

First, want to make around \$300-400 with ewhoring, then continue ewhoring but with less effort and [deleted]. I would like to leave ewhoring as soon as possible because I need to split my profits 50-50 and it also gets on my nerves. When I made around \$1000-1200 i want to buy shopify mentorship and start a shopify shop. I already have a nice idea on niche, if I see I can make good money with it I'd open a private enterprise, but in my country the monthly fix expenditure would be around \$300, so I'd need more profit than 300. These are my plans and looking for advices, what would you change?

ewhoring is good for making a quick stock of money to be invested later. Ive done kinda the same thing too

If you are good at ewhoring, keep doing it. There are people who can make thousands in a day ewhoring because they have automated their private methods.

Also don't waste your money on a shopify mentorship. I've seen people spend years learning shopify and they still have terrible profit margins. You will need a lot more than \$1k if you want to be successful in the saturated shopify market.

I would invest into sports betting, if you know what you're doing it can be an extra edge to your income

Another shopify is not a good idea at the moment

Could you first start off with explaining why you have to split your ewhoring profits with someone else?
