Thread: [Best place to talk with business partner ?](#)

Think1st - November 8, 2019, 6:08 pm

as title says what's a good place to talk that also has some privacy if there is any now a days to talk or whatever about our business

we currently use jabber and privnote but that's just for typing messages but we are trying to find a place to talk we use to always talked by phone is there any suggestions ? ?

-itsJonny - November 8, 2019, 7:26 pm

When you say place to talk, are you saying through some app or a physical location?

You can look into 'seecrypt' for voice calls

Quote:Secure Phone Calls

End-to-end encryption provides complete privacy and precludes third-party eavesdropping, even across ad hoc conference calls.

Don't trust privnote. Signal is good for phone calls and self deleting messages. GPG with enigmail is pretty nice as well.

You didn't send my cash app

And you cancelled it in the middle

Zeus - November 9, 2019, 3:06 am

Xmpp why not I use that alot

WickR for Android.

Not sure about windows. Only need to use encrypted messaging via phone
