Hello,

I have a question, my brother has made account on this website before GDPR.

He was 10 and now he still uses it, and he's 12 and it says to accept the new rules -- You agree that you're at least 16 years old if you are a resident or citizen of the European Union. Non-EU residents agree that they are a minimum age of 13.

But what should he do now? He can't click anywhere else and asked me to help.

Also my cousin has accepted the rules already and he's not 16 yet and he lives in EU, can he have his account deleted or what should he do now? Is this illegal can hackforums sue him?

Thanks, QuickPack.
