Is there any way to save GIF videos from twitter?

Do you mean using phone or desktop?

yea, first you "copy link to the tweet" then paste it in one of the "twitter video downloaders" (there are many, just google it), then you'll be able to save that gif as a mp4 video file.

You can use a site like this:

<http://twitvid.com/error>

You can follow someone called @this_vid or something and everytime you tag him he will download the video for you all you have to do is go to his website.

Wow, that is actually a pretty dope idea. Whoever made that is doing something right xD

EDIT: wow it actually works too xD

I had to test this out lmfao

You can use online twitter video downloader.

That is the fastest way.
