Thread: [Need simple light burst text effect for website banner.](#)

GoodEgoMind - November 11, 2019, 5:00 pm

I'm not sure on the size.... Just a common size to use as title and quote banner at the top of my website.

Color scheme... Text to be white. Light burst to be gold, yellow and white.

The text should say....

EGO- MIND

Seeing behind the veil with an individual Ego-Mind.

The text for the title should be a common simple font in large, bold, caps. The title should have the light effect. The quote does not need a light effect. It should use small, bold text which may or may not use caps.

Any questions, message me. Thank you in advance.

Since I can't find the dimensions for my website, how about we make the banner for my Facebook account instead? Same instructions for what I'm wanting. Theres a website that explains its preferred dimensions for a Facebook banner as of 2019. It looks like the size differs depending on desktop vs. I phone. I don't know if it matters but it won't let me post the link. All FB page banners use the same dimensions however it's done. Thanks for the reply and apologies for the delayed response.

Actually it's called a cover photo. Sorry about that.

Actually it's called a cover photo. Sorry about that.

If possible a matching icon to go in the photo area of my Facebook would be great if you are interested to do that as well. The icon picture should match the cover photo except without the quote. So it should say just EGO- MIND.
