Thread: [\[FREE\] Proton VPN - Unlimited Premium + Download](#)

Who Soup - November 11, 2019, 11:20 pm

Hey guys, by creating free accounts you can basically get unlimited premium trials from ProtonVPN. Using this tool I created you can quickly create accounts so your premium never ends; here's how you do it.

- 1) Go to <https://account.protonvpn.com/signup> and select their free plan.
- 2) Create a username/password
- 3) Run the program then double click the email to select it then press ctrl + c to copy, then paste it into email section on the website
- 4) Verify using email you just created
- 5) In the program press enter to begin looking for the verification code
- 6) Verify your email using the newly generated code
- 7) Enjoy ?

Thanks, the premium servers are normally pretty good + secure core and no logging

BTC - November 12, 2019, 4:36 pm

Pretty interesting, I did not know they even gave free trials. Never had a use and still don't but nice work ?

This is just the free version right - so it's just verifying a dummy email account.

When you get a new account you get 7 days of access to their premium servers. The intent is to make the process of creating an account as easily as possible.

Hmmmm I just did it and I got my free 7 days? After you complete the registration (on your web browser) download the program and login, that's where the free trial should show up.

Hmmmmmm it looks like they changed the website so that the email is server side generated so it's harder to scrape. I'll work on an update for it, thanks for bringing it to my attention ?

Who Soup - December 23, 2019, 1:43 am

Hey guys! Huge shout out to [Parks](#) who sponsored this update, please send some love his way ?

Version 1.1:

(updates)

-Major bug fixes

-Ability to generate custom or random username for email

Tested this out and the program works. Verifies your code and everything. They no longer off the free trial with new accounts. ;(

Hey, thanks for checking out the program ?

I just gave it a try and it looks like everything is working ok for me. The 7 day access is only activated once you log into the actual program, I don't think you can activate it on a browser.

Let me know if you're still having trouble!

Only someone with a small pp would complain on a free giveaway 4real. Also I got that same PM from [G2a Refund](#), I wouldn't recommend opening it since it's a .pdf extension.

Tried this earlier today and they might have patched the email method. I used my mobile # to confirm/receive the code and then it granted me the 7 day free trial of Plus.

I'll try again later tonight.. Hoping it was just a fugg up on my end.

Hey! It looks like it still works. I think you made too many too quickly. If you want to make multiple you can always switch your IP (using their servers) and generate it that way :)

VB.net or c#

They're basically interchangeable:)

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
