Thread: [\[HOT\]](#) [\[Limited\]](#) < BustaDice \$\$> Ultimate Script [Low-High Risk] [\$20] [3x Profit]

ChumChum - November 13, 2019, 12:06 am

HOLDING THIS THREAD TO EDIT:

IN short I have a custom script for bustadice, that CAN make you big profit. This was privately coded by a group I do have rights to resell as it was made for use.

It is recommended to have atleast \$20 to invest.

With that \$20 you can guarantee no busting.

Profit in an hour can be anywhere: \$10-\$30 if done right. With just the \$20.

Of course, I would be a liar to say you wouldn't lose sometime, but the way this works you can make profit before anything.

Gambling is gambling but the script works to minimize the loss and make the win the most.

The feats:

Low-High risk setting

-minimum betting/max

-9 level you can choose from

-Stop at a specific amount

-steady to high

high-speed seed change.

Specific dice rolls

Reason I am selling: gambling cannot be saturated. I am saving up for a new laptop by black friday, the more money the better.

I will accept btc and paypal friends and family only. Unless you have a service or item I am interested in.

Have you ran it yourself if so on what username ? ?

ChumChum - November 13, 2019, 8:31 am

Yessir, sadly I used it later in my retarded career. What proof I made my \$20-\$40 when I did run it is short sighted. You are welcome to pm me for more direct proof in screen.

ChumChum - November 13, 2019, 6:35 pm

I bought the script:

Honest review: It won me a bit at first (\$6-7), but then I became greedy and let it keep going; lost what I won, so I stopped. It's super sensitive and moves fast. Worth \$20.
