Enlightenment Services

ISP Information Acquisitions

Price: 75 per IP

ISP's supported: All American ones, UK, australia and canada. I charge extra for off brand or small isps with less then 10 employees, for those its 150.

Social Media Banning

Price: 500 per account ban

Sites we focus on: IG, FB, discord and snapchat

Inactive OG Claiming

Price: 1k per account

Sites supported: IG and twitter

Account SMS verifications

Price: 10 per account

If you need a fresh phone verified account we can get it done.

Anti Swat and Anti Dox(Detracing) Consultations

Price: 250 per session

I will go over with you on your chatting platform of choice such as discord or whatever how to make your self much harder to find and ill throw in ways to make your self unbombthreatable and unswattable. Nobody has ever implemented the bomb threat protection measures before so thats new and only a few people know how to make them selfs unswattable. I will also teach you a unique way to make your self unispdorable which nobody also has used before and its not a simple account note. If someone pulls info on your IP they will get false info.

Cloudflare and Other Reverse Proxy Bypassing

Price: 50 per domain

Many people can do this but your paying for constant availability and an efficient job when you choose my services. My reverse proxy bypassing is no exception, I will get the backend IP 100 percent and if for some reason I can't you will be refunded on the spot.

Digital Bodyguard/Security Threat Analyst and Responder/Counter Intelligence

Price: 1.3k per month

If you're a big instagram or social media influencer or just own a popular page and social media is like a job to you, you're more likely to be a target of stalkers and other malicious people. By hiring me ill constantly be there managing the security aspects of your accounts and your digital life in general. If someone targets you the threat actor will be identified and will face consequences. I'm very good at this and have assisted various people in the past.

Private Method Method Mentoring And Consultations

Not only will I consult by telling you what to do I will take you under my wing with these and show you exactly how I do it. Since this is both consulting and mentoring im charging a bit more. Here are

the categories with their associated price tag:

Email/Misc Account Recovery - 5k per session this is expensive because i'm basically going to give you private ways to get accounts at popular places and even take an example account or attempt to take one because nothing is guaranteed just so you can get a feel. People always want to know how to get into accounts so I see this one being popular. This one will probably be a group session exclusive so I can use screenshare to show everyone what im discussing and it will be a hands on engagement.

ISP Investigations/Doxing Mentoring - 500 per individual session If anyone wants to learn how to get into the whole ISP doxing field you would be coming to the right guy, I'm notorious for being one of the best social engineers and I used to have hackers from notorious hacking groups come to me for help over the years since they were too lazy to do it themselves. I also used to have just people who needed people found with minimal info such as a single static identifier and I was able to get everything for that person.

Entrepreneurial And Money Making - 325 per session

If anyone wants to learn about starting a company or small business, online methods like dropshipping, affiliate marketing and more you came to the right guy. I'll show you examples and how to to about doing a lot of this stuff. You probably seen youtube ad rolls before videos of guys offering this but ill be teaching a broad array of topics which makes my program better. I'll also teach crypto, forex, stock and other forms of investing if that rocks your boat. Whatever else that comes to mind related to money making will probably be taught eventually as well. Every session will be about a different topic so be sure to attend all of them.

Web Application Security Mentoring - 200 per session

If you want to know the ins and outs of securing your web app to make it as difficult to hack as possible you'll definitely want to choose this mentorship program.

General Private Investigation Mentoring - 1k per session

This will also include ISP related stuff + a whole lot more about being a PI so I highly recommend this one if you want to do more then just ISP stuff as a PI. After this program you'll be an extremely good doxer I guarantee it. Everyone who I mentored became amazing at it, some even ended up impressing me and figuring out more efficient ways to do stuff so you may even end up becoming even better then me who knows.

If multiple people purchase a specific program they'll be invited into the group mentorship discord. I feel people learn better in groups but if you want one on one im fine with that as well but I have the most fun teaching in group sessions.

I take bitcoin or PP or even amazon gift cards on occasion as well.

If anyone wants to join the Enlightenment crew we can always use more staff aboard so PM what you can bring to the table and for more details if interested in joining us!
