Thread: [code correction help \(\(revenge rat \)\)](#)

Fdsfd Fdfdf - November 18, 2019, 6:11 pm

hi HF people

can anyone help me to correct an error on this code , please ?

"Delegate 'EventHandler' requires an 'AddressOf' expression or lambda expression as the only argument to its constructor "

[pastebin.com/raw/r82NwQwZ](#)

thanks in advance

MavenGradle - November 18, 2019, 6:19 pm

Why don't you ask [NYANxCAT](#) ? Also, you should post this in the Visual Basic forum:
[Software Development](#)

thanks guys i solved the problem

#Kat - January 11, 2020, 3:06 pm

most likely you probably could have omitted the line.. not familiar with what your working on but most older socket classes did not finish this before he her him it them released
