Thread: [Programming, Schools & Chess Help](#)

c00lkid66 - November 19, 2019, 12:01 pm

Programming

I can program anything, from websites to scrappers to bots to apps. I know many languages, python, c++, php, html, css, js, java, c# and many more including some weird ones like asm and apl. Check my market score for proof of completed deals. I'm also going into computer science next year for college.

School

I currently have a 5.2 GPA scaled out of 4, unscaled it is a 3.9, due to me taking 14 AP classes so far. I have gotten 5s and 4s on AP physics, chem, us history, euro, lang, lit, calc ab, stats, env sci, and psych. Currently taking calc bc, ap physics c, comp sci principles, and comp sci a. my sat is 1520:

I have more images to verify my achievements. If you need them. I can do homework for you or teach you anything

Chess

I'm currently rated 1800 FIDE, and have been playing chess for years. I've won several local tournaments. I can coach anyone of any rank so if you want to improve then I'm the guy.
