We recently went to a foreign runok. We sell links. We have many customers from the casino and adult market. Try our service to improve link mass. For us, very low prices. <http://trastik.com/en>

Thanks for the offer Trastik. However, I'm looking for a real black hat SEO hacker that knows how to bluff google and redirect traffic into my website. Or simply rank whatever keyword I want.

I don't think there exist any service that can guarantee the first page on any keyword you want. Give us more details about your keyword competition and you may get more serious offers.

I must of lost my sense of humor completely when this izz funny :<< Nice doggy pic, very funny.

For someone who has actual skill feel free to hit me up. I can show you how it's done on an real google example. Just want something like that for myself. It's been a hard way since 2007 and with actual google and everyone else black hatting around it's really a struggle to rank, even though I've made plenty of SEO (pharma - bodybuilding) :<

Yes, there are still some way to get rank in google, but things had been changed a way long than we expected since years...but there will be always a solution, but now a days we are getting more local ranking in maps (hope you had noticed even ADs starting showing up in local listings...so we need have different strategy to get ranks these days...and sooner or later we had change it again to sustain our ranks.

These are really difficult niches to rank for, even blackhat (also, ranking with blackhat techniques is a lot more difficult than it used to be). I honestly doubt there's people on here that can accomplish this for you, please be careful who you trust and give money to.
