Thread: [BTC Bitcoin will BullRun to \\$1 Billion 2020-2022 - HERE is why!](#)

shredder - November 21, 2019, 10:10 pm

<https://hackforums.net/showthread.php?tid=5916991>

I utilized Mining statistics last year to find out that reversal was likely in 2018 during 3k, we're going to do the same this time. And I know BTC didn't go to \$1M it's just clickbait title, I was just saying reversal was near and that bottom was likely found.

Current example of large scale miner cost - Antminer S17 Pro-53TH/s & 12.9+e12 difficulty
Spoiler ([Click to View](#))

2018 Drop mining difficulty followed down by -31% and exponentially dropped as price dropped. The idea is killing off small miners while big miners with low overhead would making BANK BANK. Source:Blockchain.com

Difficulty drop from 7.4+e12 difficulty to 5.1+e12 difficulty and rapidly increasing as it went so much so that price wasn't even dropping faster than difficulty.

Spoiler ([Click to View](#))

Following similar concept say we drop from current peak of 13.6+e12 by -31% is around 9.3+e12 difficulty.

Spoiler ([Click to View](#))

That miners would be making the same amount until 5.5k at 9.3+e12 difficulty. And by then difficulty will exponentially drop as price could dip below 5.5k.

Spoiler ([Click to View](#))

Miners told us exactly when and where bottom was likely to be in 2018.

Low price + long time since last bull run + technological advances + much more regulation speculation + much more adoption speculation + scarcity FOMO will be the formula to the next bullrun 2020-2022

WhyYouKeepDoingThis - November 22, 2019, 1:29 am

So BTC will drop to 5,5K and then we will see another bull run?

Money4life - November 22, 2019, 2:03 am

(Nov 22, 2019 02:29 AM)WhyYouKeepDoingThis Wrote: [\[CITE\]](#) So BTC will drop to 5,5K and then we will see another bull run?

If it was just that easy to predict the btc charts lol

mrclinton - November 22, 2019, 7:02 am

BTC going back to \$1 sounds more realistic than to BTC going to \$1Billion in 2022. ?

Cyber Coder - November 22, 2019, 8:51 am

there is always some lunatic who says btc will be dead and another one who thinks it will reach millions . Keep dreaming, btc on 20-30k in next 2-3 years is the most optimistic scenario

wiz - November 22, 2019, 8:54 am

I don't know how accurate that is especially when "Bitcoin Drops to \$7,000 as China Vows to 'Dispose of' Local Exchanges"

<https://cointelegraph.com/news/bitcoin-drops-below-73k-as-china-vows-to-dispose-of-exchanges>

Money4life - November 22, 2019, 9:38 am

Agreed, but if this happens it will take a huge hit. Especially being that China is a huge factor when it comes to crypto.

Money4life - November 22, 2019, 9:44 am

True, but glad that btc takes these small hits. Buying the dips. Predicting a bigger ATH 6-12 months after the halving. First time we are heading with a bearish market to the halving.

wiz - November 22, 2019, 9:44 am

Hopefully you win, I am holding \$1000 in BTC and letting the market ride.

Pablo? - November 22, 2019, 7:12 pm

i had a dream that it will shot down like a deer and then sky rocket like a fkin mountain ... but it was in a dream lol

SIM-4086413 - November 22, 2019, 8:49 pm

i believe in a very big bull run around late 2020 and early 2021, one that might even touch up to 50k however, i don't believe that bitcoin will reach up to a million a coin in the next decade, let alone 1 billion which is entirely impossible even in 50 years from now.

Bitcoin will never reach 1 billion each, never.
By the time cryptos are that big, bitcoin is already replaced.

Don't forget that we are literally at the beginning of cryptocurrencies and blockchain as a whole.

Skyline - November 23, 2019, 10:38 am

(Nov 22, 2019 09:49 PM)Magaddino Wrote: [\[CITE\]](#) Don't forget that we are literally at the beginning of cryptocurrencies and blockchain as a whole.
But look at the beginning of the gold rush. Now look at what we have today.
BTC = long term hold now.

SIM-4086413 - November 23, 2019, 11:05 am

(Nov 23, 2019 11:38 AM)Skyline_temp Wrote: [\[CITE\]](#) But look at the beginning of the gold rush. Now look at what we have today.

BTC = long term hold now.
I was talking about 10-50 years down the road.

Gold is a metal that can't be replaced, it is as is.
Bitcoin is technology and you can change and improve technology, it's human creation afterall.

In 50 years from now cryptos and the blockchain will be extremely different and will not be comparable to today's cryptos and blockchain.

Bitcoin is replaced by then with something we can't even imagine right now, not just the currency aspect but the entire technology around it including how payments are done, what we can do with the blockchain, how it works and how it applies to our daily life.

However for now and the next decade, definitely hodl bitcoin, smart move as i said we are still at the very beginning of this technology and bitcoin is the face of blockchain, for now.

Unexplained - November 23, 2019, 5:51 pm

My belief is we will see a six figure price on BTC in about 5-6 years after the halving of 2024.

A 1 billion price is absolute lunacy. Sure I'd love it... but I'm realistic.

Walter_r86 - November 24, 2019, 3:06 am

so 1 billion \$ for 1 bitcoin? i wish that lol...we will all be rich if it happens :) i searched google for predictions on bitcoin for next year and all the sites say less than that...

SIM-1567847 - November 24, 2019, 5:35 pm

Bitcoin is pure speculation - so your guess is as good as my neighbors.

shreder - November 24, 2019, 6:58 pm

(Nov 24, 2019 06:35 PM)Retrograde Wrote: [\[CITE\]](#) Bitcoin is pure speculation - so your guess is as good as my neighbors.

Has nothing to do with guessing.

VarNull - November 24, 2019, 7:54 pm

So what price do you think we will go to right now? Crash to 3k before shooting?

Everyone is fudding, great time to buy in some

Paxton - November 26, 2019, 3:56 am

Gotta love the optimism ok this one. I remember when I was a dreamer once...

Aussie - November 26, 2019, 4:12 am

How stupid do you have to be to say bitcoin will reach 1 billion per bitcoin.

That's 18 million * 1 billion = \$18,000,000,000,000,000 (18 quadrillion market cap)... There's only 36 quadrillion dollars worth of money in the world.... Fucking idiots.

Trialz - November 26, 2019, 4:55 am

wonder why people hate on btc post like this regardless if it's right or wrong stay positive if anything I love these post it make's me feel rich lol but all jokes aside who really knows if it does to all the negative comments Shreder getting the last laugh if it's true.

Ight im going to sleep been up for 28hr RIP

Money4life - November 26, 2019, 6:08 am

If you actually read the thread it says it was just for clickbait...would help actually reading whats posted before commenting on it.

sNize - November 26, 2019, 7:02 am

i hope for a ethereum comeback.. bitcoin only needs 150% to be back at the highest value, ethereum still needs over 1000% to recover

urns - November 26, 2019, 10:19 am

No way bitcoin reaches a million or a billion so early, I don't think so, but 6 figure price I do believe in it.

Raed Imhabij - November 26, 2019, 3:54 pm

I don't really think it's that easy.

But yeah BTC might grow to very big sums I don't disagree

Linux X - November 26, 2019, 11:45 pm

Incorrect. Learn your material before you cover it.

Shelob - December 16, 2019, 4:46 pm

We are 0.00069% of the way, lets go!

minister1987 - December 16, 2019, 5:09 pm

I believe that will have another bull run in 2020-2021 and I think \$20k-\$30k will be the targets. Everybody is telling that bitcoin will die but everyone say that since 2012.

SIM-1567847 - December 16, 2019, 5:26 pm

(Dec 16, 2019 05:38 PM)Mastor Wrote: [\[CITE\]](#) Incorrect. Learn your material before you cover it.

Yes please do let me know where BTC gets it's value from? Other than one person wanting to pay more for it than the next.

LucasPeb - December 16, 2019, 5:43 pm

I believe that bitcoin will be at 20k in the end of 2020, 30k till the may of 2021, then it will trade between 15-35k till the may of 2022. Then, a big bull run will start and 120k usd per btc(probably in the end of 2022) will be in front of us!(hopefully)

01001 - December 17, 2019, 3:11 am

I'm holding good amount of BTC and would continue the same untill BTC goes up to 20k. No matter how long it's going to take!

Gold is a metal that can't be replaced, it is as is.

Bitcoin is technology and you can change and improve technology, it's human creation afterall.

In 50 years from now cryptos and the blockchain will be extremely different and will not be comparable to today's cryptos and blockchain.

Bitcoin is replaced by then with something we can't even imagine right now, not just the currency aspect but the entire technology around it including how payments are done, what we can do with the blockchain, how it works and how it applies to our daily life.

However for now and the next decade, definitely hodl bitcoin, smart move as i said we are still at the very beginning of this technology and bitcoin is the face of blockchain, for now.

Gold is gold because it has limit in its supply growth (~2% per year for the past 100 years), and because no one can artificially create gold.

Bitcoin cannot be replaced by another crypto currency for the same reason, money is all about trust and a big portion of bitcoin believers like me believe in bitcoin because it has no owners, more than 3K crypto currencies tried to replace bitcoin including BCH which is technologically way better than BTC but we all see where they are now.

Saying that something will just fall off the sky and replace bitcoin with the same concept as bitcoin is like saying that some other metal will replace gold in future, nope not gonna happen.

(Dec 16, 2019 06:26 PM)Retrograde Wrote: [\[CITE\]](#) Yes please do let me know where BTC gets it's value from? Other than one person wanting to pay more for it than the next.

It's more complicated than that.

(Nov 24, 2019 06:35 PM)Retrograde Wrote: [\[CITE\]](#) Bitcoin is pure speculation - so your guess is as good as my neighbors.

Every asset in the world is pure speculation, stop listening to the news, gain some knowledge and make decisions based on your knowledge.

(Nov 26, 2019 11:19 AM)B1TCS Wrote: [\[CITE\]](#) No way bitcoin reaches a million or a billion so early, I don't think so, but 6 figure price I do believe in it.

Because you don't understand economics.

(Dec 16, 2019 06:09 PM)minister1987 Wrote: [\[CITE\]](#) I believe that will have another bull run in 2020-2021 and I think \$20k-\$30k will be the targets. Everybody is telling that bitcoin will die but everyone say that since 2012.

Point me to those "everyone" that you refer to

xshotar - December 17, 2019, 6:10 am

Probably 50 years down the road it will finally hit a million we can only dream lol 0=
