Thread: [\[warning\] HF user trying to infect people](#)

4Txe4y33C9zvNhMj - November 22, 2019, 1:13 pm

Good evening,

this trash user ([Hack Forums - Profile of Tokyo662](#) aka Tokyo662) is trying to spread his shitty LimeStealer keylogger trash via the botnet section, tells people he made shit (reference: [crypt my file for me please](#) and <https://hackforums.net/showthread.php?tid=6026687>).

His LimeStealer is some shitty C#.NET pasted trash stealer, delivers mails via SMTP. Not even packed or anything, just his plain ass stub. The file he sent me was called stub.exe (renamed it to BISquad3_1.exe before uploading it lmfao).

Him saying that he teaches people to code: <https://i.imgur.com/T1n47nC.png>

Him sending his shitty stub: <https://i.imgur.com/YsLdX0l.png>

Him saying he can't actually code: <https://i.imgur.com/2O5evSQ.png>

Him asking for help: <https://i.imgur.com/FaqXvsS.png>

Don't run shit you don't trust and have the source for. Especially not if it's some shady kid on HF.

Best regards,

4Txe4y33C9zvNhMj

Lmfao, this guy is pathetic ?

Bluffer - November 22, 2019, 1:22 pm

Good of you to warn the community publicly but infecting members is taken pretty seriously here. I believe you are supposed to contact the admin so it's removed promptly.

Mayuko - November 22, 2019, 1:25 pm

The ban hammer will strike again lmao, thanks for the info.
