First I'd like to give a vouch to [LOKFLOKI](#). His service is very professional and the product is extremely lucrative.

You can easily turn a profit using this and given the configuration options, you're in control of your rate of profit as well as risk factor.

I highly recommend this to anyone new to or experienced with crypto-gambling. All around fantastic product ? (Nov 26, 2019 04:54 AM)Rad1 Wrote: [\[CITE\]](#) I purchased the 1 month license and here's my opinion.

I'm \$5 in profit (started with a \$30 balance, though \$10 is ok if you're betting conservatively) and have been running the script for about ~11 hours. I chose level 3 (there're 10 levels, 0 being the most aggressive) and so far it's been good.

The more conservative you bet, the longer the run time. There's a stop limit so you can set the program to limit betting at an amount you're not willing to lose (for instance; "Don't bet below 2000 bits"). Everything is setup for you, all you need to do is pick which level you want the software to run at.

Great product, highly recommended.

I DO NOT CARE IF THIS SCRIPT LOSES YOUR MONEY, OR IF IT WORKS AT ALL. MY PRODUCT IS THE LICENSE. I OFFER VALID LICENSES FOR THIS SCRIPT TO WORK

I've been getting only good results back from my buyers so far, but again, I do not guarantee for the script to work.

AS OF 11-23-2019 I DONT SEEL WEEKLY LICENSES ANYMORE. MONTHLY OR LIFETIME ONLY FROM NOW ON

@OP you need to find someone who can give details review including investment, run time, earning/loss, earning proof, if possible screenshots etc.

EDIT: I am not asking a review copy, I will never test gambling script again.

This comment was so unnecessary. I will update the post with more details when I have longer periods of data on the earnings. Think before you trash post. Thanks.

His vouch is sufficient. You guys are missing the point here. Fucking read the whole thread before starting to talk bullshit here.

AS I MENTIONED IN THE FUCKING THREAD FOR THE BLIND, I'LL MENTION AGAIN

I DO NOT CARE IF THIS SCRIPT LOSES YOUR MONEY, OR IF IT WORKS AT ALL. MY PRODUCT IS THE LICENSE. I OFFER VALID LICENSES FOR THIS SCRIPT TO WORK

I honestly don't care about your profit, your loss, your run time, how you run it, the script is not my product. Don't come to me for this. Go ask Scripthub for that info.

As long as the vouch copy says that the license he received from me is working, I dont give a flying fuck afterwards.

Well in details review mean everything including profit/loss and this always help both seller or buyer, I dont see anything wrong if I want to know more about a product from a real user (in this case from reviewer), is this wrong?

But yes I did not read your last line about what you said that you dont care, I am really Sorry. Anyway GLWS.

I comprehend why some people are apprehensive buying (or renting) this script. I like the features (especially the level 10 conservative one), though having a little more information about the product, couldn't hurt. I've tried a few scripts before and I've busted on all of the them. I'll try the week license (maybe the month) and will report my results.

defame - November 25, 2019, 9:14 am

So basically you ripped someones script, implemented your own licensing and are now selling it for a cheaper price?

Or did I get it wrong?

Do you have a video of the script in play?

I got all the information the creators of the script gave out, I literally cannot give anything else. But whenever I talk to my customers they always ask for recommandations, and I tell them how I use it but that's it. Since I do not have access to the code I don't even know how the script exactly works, that's why, I don't want no kid come around here complaining that he lost his money using this script, because that's not the point of my thread. I am selling a license, do whatever you want afterwards.

I get it now. You're just a few brain cells shorter than most.

How can you possibly object to something you are clueless about? That makes no sense. I HAVE tested the script and I surely have the competence to determine if this is something anyone can use regardless of experience.

Just stop. Please just stop.

It's childish is it? I'm assuming you don't know much about the adult world then. Considering I'm a full time employee who also works consistently with clients remotely as a IT admin. That's not including the side jobs that I take doing web development.

All that aside I did not know there was a required time that one must leave a review. Oh wait... there isn't. Silly me.

I was doing the OP a favor not the other way around. I benefit nothing from this due to the fact that I am so damn busy. Me trying the script and giving my opinion and vouch means something to the vast majority of HF users as opposed to you who's comments are practically meaningless. Especially this one.

Yeah, I know that, I dont have some idiotic brain cells that most idiots have.

First you said you are so busy, then said you dont have enough data and now saying something else!!! Most of bustabit user's already know how to use a script, all know no experience need other than copy pasting and changing settings suggested by seller, then who need your opinion on this?

If possible post In Details Review or just stop. If you dont know what is a Details Review mean then we have thousands reviews in this forum given by various member's, go check them then you will learn what is meaning of an Details Review and what I am saying. About time you not only person who doing real life job in this forum, OK?

OP already said he satisfied with your vouch and this is a sales thread, I dont want to argue with you here so if not possible post an in details review by you then just STOP.

OP if possible please add some more info like minimum investment, SCRIPTHUB link, some proof that script work etc. After buying script license from you can I get support from SCRIPTHUB?

Rad1 - November 26, 2019, 3:54 am

I will not add more info for the script, because as I said I don't want to get involved in that. I don't want people come complain to me about their script losing them money when I didn't create the script.

There's enough proof here, if you add me on discord I can show you more. No, you cannot get support from SCRIPTHUB. If you want support you can buy it from them for 10x the price.

I know way more about the "adult world" than you. Been an adult way longer as well. You are just selfish and wanted a free method ano or license. I am way more busier than you.
