Thread: [Portmap / Serveo secure?](#)

F.A.S.T - November 24, 2019, 7:19 am

Are websites like these secure? I mean I've had ghost connections on serveo on common metasploit payload ports but is it under surveillance? Like FEDS? I use portmap because it's better than Server.net but I have doubts about it.

I would say it certainly depends on how you use it. If you have a big Botnet running on your Portmap Address and it is tracked back to you, the Portmap Owners/Operators will most likely give your data to the Feds.
