I am 100% on your side, don't trust people that are gonna "FUD your stub for free" or others that are "giving away Private FUD FREE cryptor" most likely they will infect your file and maybe FUD it LOL!

I tried a lot of free crypter that promiss to be fud .but none is fully fud , so I highly recommend to spend some money in fud crypter , but one other most important question is that what is the right source to purchase fud ?

there are many active threads which you can use in place of bumping on old threads.
