Thread: [App Hide on iOS](#)

Stellen Sie TT - November 25, 2019, 11:41 pm

Hey,

Anyone who knows of an app that can be used to hide stuffs on iPhones?
I know of calculator+ but it doesn't seem to be working anymore.

You can use the options like folder lock, private Area, iDiscrete and My Hidden Folder Pro. Apart from that, you can download apps like RV AppStudios and SmoothMobile to hide files on iOS devices.

Which is an APP? Which is within the parameters of the phone?
