Yes, you can do it as many times as you want & it works 100% of the time. Unless you have bad proxies.

flavoral - November 26, 2019, 12:25 am

can you provide proof of having \$400 balance on multiple accounts.

Are you willing to provide a vouch copy to a trusted member (not me), someone with 100+ b ratings at least?

Calling this BS without a trusted vouch.

P.S. I'll buy it off you right now for 500\$ if you're willing to use a trusted middleman.

I am not sure if OP is willing to give one, but I, as someone who has been here for years and have hundreds of + B-rating, am willing and would love to help review and vouch for this method.

Let me know, OP.

Well if he doesn't I don't think much will be left to open discussion.

He's A. not going to make any actual money, unless he finds a fool that would trust him under the

circumstances.

B. Most likely trying to pull a scam.

Would be shortsighted of him not of him not to give a vouch copy if he was legit.

jefnun - November 26, 2019, 4:22 am

is it safe? will facebook found this and get banned

Yes middle man are welcome , i'm fully transparent mate

Alright sounds good, will facebook ban the page/company from using the ads in the future using this method?

Ah, that's my issue, I'm not sure about the legal issues if I were to advertise an actual company and not a product/service.

As I could most likely end up with a lawsuit.

go ahead with a middle man , i don't get anything unless you know this method works

Rondinho - November 26, 2019, 7:30 am

One question,does this have to do with US VBA(Virtual Bank Account) if so does it work on freshly created facebook accounts?

I'm confused on how that above photo proves anything?

So to put this any easy perspective I'm the issue that's been plaguing Facebook more importantly the Facebook ad campaign Department. They had this bright idea of promotional coupons that you could access or really game get rewarded with barely any issue

Obfuscate - November 26, 2019, 11:24 am

Pretty sure the account dies way before you spend \$400, and I am guessing TAT would be a few days. Facebook's fake account detection algo is pretty good too... you posting a screenshot with \$0.08 spend shows nothing, pal.

clashituserforum - November 27, 2019, 2:26 am

Lets not forget tekashi 69 that was running this scam for months.

Everyone can take a screenshot of their ad account with a low amount.

The fact that he is selling a 400\$ threshold method when he doesn't even have proof of multiple accounts spending \$400 days it all.

This IS a scam people, don't fall for it

Aerozzz1 - November 27, 2019, 8:28 am

Funny how many people keep saying its scam when i said to use middle man

SIM-2866927 - November 28, 2019, 4:04 am

why do you even want to sale this type of method, if is 400 \$ really for free this can make you more money then selling it here on hf :D

hulksta - November 28, 2019, 4:34 am

wondering why you're not using this method instead selling it since its so profitable ?

Then what's the purpose of this??? I need to advertise my site not a dummy site. Not sure what the benefit is here if I can't get traffic and sales on my products. Or there is maybe a way how to do it and I am missing something?

Maybe you can use these 400\$ on a dummy page and promote "generators or h@cks" if you can do this everyday is 600\$ easy moneys per day. So why not ? For sure this not worth for white hat. Good luck
