Thread: [After Client restarts pc i lose connection indefinetly](#)

Official Aushington - November 26, 2019, 12:28 am

I am having a problem with Revenge rat 0.3. Whenever I establish a connection on my VM and restart it I lose the connection and it never comes back . (all av is off on the VM) any suggestions? Thanks ? lost multiple real clients because of this :(

i already am using your version lol. Also do you have any suggestions for crypters that work with revenge? thanks

also the complied version of the builders link is broken :(can you please send a new link? thanks

There is no startup feature. You must use a crypter. I can't recommend one.

Fixed version

[RevengeRAT v0.3 & njRAT v0.7d | NYAN CAT Version - YouTube](#)

Fixed builder

[\[Fixed\] RevengeRAT - LimeBuilder | Stable Client](#)

Other link

[RevengeRAT - LimeBuilder v0.1.1 \(SRC\) By NYAN CAT | Download | Connect Trojan](#)
your Fixed Build for compiled version, the link is dead.

Should i just use the lime builder thats in the full fixed version because the password dosent work for the lime builder src and the compiled link is dead, Thanks! ?

and last thing, i should use a native crypter correct?

White Bruse - December 3, 2019, 5:40 am

what is the password please
