Seems intresting, as someone that sold bots and has bulk accounts, id be willing to do a review if u are offering a vouch copy, if not good luck with sales

**Lextian** - November 26, 2019, 6:39 pm

Posting to find this later as it would come handy when i need it.

I have sent you a PM.

Best regards,

A new update has been released. (v1.7)

- Fixed JSON parsing errors due to obfuscation that made unable to follow/like when targeted.
- Fixed small bugs.

Waiting for Op to accept contract then will post review

I have updated the bot version to 1.8 and now there's a thread design looking way better than plain text (thanks to Kornis).

Whats new in this version?

- Engine updated! Now it can use any kind of user-agent.
- Added logout function for a safe bot stop. It will make IG recognize the device the next time you login.
- Improved stability.

Offering 3 vouch copies! PM me for a code.

Cheers,

Definitely going to purchase this Friday, I've just registered a new IG meme account and haven't posted on it yet so I'll use this as soon as I buy it and I could possibly post a review.

can you update the thread?

**BalleJatta** - June 3, 2020, 11:38 am

Does this have the Story viewing feature and engaging with people you view story off?
