Thread: [E-Commerce mentorship | How to successfully sell a product with no investment online](#)

Raed Imhabij - November 27, 2019, 1:16 pm

Note: You need to make a discord account as this will be a discord group, we will do many video calls, I will record videos and we will discuss everything there, we all can share new methods if we learn anything new, I will be active around 10 hours a day.

Available spots: 4 out of 6 (We gonna keep the circle small to minimize the odds of this getting leaked)

asme#8781 is my discord if you got questions or wanna buy this, it will be done through PayPal (If you don't like it u can make a dispute) or BTC if you trust me.

Price: \$300

Yeah I will tell you my story, I was a stoner teen who was making like \$1500 a month frying fries at McDonald's, which obviously took a lot of time and believe me or not it was a pretty bad working environment, the manager was a dick and one day he was shouting at a worker there for a very bad reason so I stood up for him and got fired, yeah.

I was watching a lot of videos on youtube on all this Shopify magic shit and thought it was real, but it required a lot of investment, of course, I'm not saying that it's bad just saying that it's not really good ROI on it.

So since around 2017 I tried making online, I maybe made like \$40 a day at most selling some stuff, but that was not enough.

One day, I actually succeeded and ended up making around \$350 that day, which believe me or not was TONNES of money to me.

So now I am here to give back, I wanna teach some of you guys this.

This includes:

- A discord group where we will do a few video-calls a week, share information and all.
- Mentoring on how I did that, and even my personal opinion if the product you are about to sell is good.

Also

This requires no investment, I'll show you my marketing techniques and hopefully, you might come up with your own.

I'll do my best to help you if you were as broke as me I understand that and I definitely don't want you to be.

A quick breakdown of the screenshot.

14-15 September I sold my first product for \$35.

16-17 I sold a more expensive one for \$250 (The first three got it for cheaper)

And the other ones were basically some sales coming in after I stopped marketing the products.
