Asked for botnet setup and it never worked.

Wasn't going to dispute until I saw that the Builder had a virus inside of it.

I got it to make a build after running it on a VM and multiple parts of the bot don't work including the Loader which is the main part of the bot. Been trying to reach out to Blatngu over jabber for 3 days with no responses.

Good luck with resolving this.

Just wanted to say nice name.
